

Camden Extra

Slender, tasteful and eye-catching – Camden Extra windows offer a contemporary appearance, with an extra touch of class.

These high quality eye-catching frames look good whether used in a new build or to refurbish an older dwelling. The internally and externally chamfered frame gives the appearance of a clean, modern wooden frame, with the option of chamfered or sculptured beading. A featured groove on the frame and concealed drainage comes as standard.

As the name suggests the Camden Extra gives you extra;

The 70mm profile offers you extra width in comparison to the standard 60mm frames. The extra width is extremely useful in homes which are currently fitted with wooden frames, as the slightly wider frame can cover more of the untidy lines left behind by the old frame.

The Extra frame comes as standard with 28mm glazing bead, offering increased frame thermal efficiency.

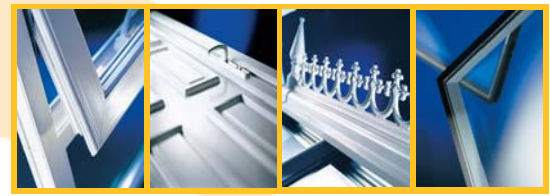

Internal glazing provides additional security as the glass can only be removed from inside of the home. This makes it virtually impossible for burglars to enter a home via your windows.

Colours - Camden Extra frames and matching external sills are available in White, Rosewood, Oak, Oak on White and Rosewood on White. The Extra frames are fitted with low level, colour co-ordinated gaskets which do not obstruct views and enhance the overall appearance.

Key Features

- 70mm Profile
- Chamfered Frame
- Chamfered or Sculptured Beading
- 5 Colour Options
- Internally Glazed
- 28mm beading

Camden Extra

Features & Benefits

- **Colour Range:** White, Oak, Rosewood, Oak on White and Rosewood on White
- **Choice:** Window furniture - White, Black, Silver & Brass
- **Character:** Chamfered Frames with a choice of sculptured and chamfered beading
- **Convenience:** Moving parts within the window simply require a light oiling once or twice a year to ensure that they continue to open smoothly
- **Low Maintenance:** They will not rot, warp or require repainting
- **Internally Glazed:** Internally Glazed, an extra security feature as the glass can only be removed from inside your home.
- **Thermal Efficiency:** 28mm beading as standard. 28mm beading accommodates a larger 28mm glazing unit, increasing thermal efficiency
- **Life Expectancy:** The profile used has an estimated life expectancy of 25 years
- **Window Style:** Casement Windows, Mini French Windows, Tilt 'n' Turn, french doors and Specials
